EuroSim MK 6 License Agreement Standard

This is an individual user license agreement (hereinafter referred to as 'License Agreement') for the use of the EuroSim Software in the version mentioned below. To be able to run EuroSim, a license key is needed. A license key will be issued only upon receipt of a fully completed and signed License Agreement. Upon signature of this License Agreement, Licensee agrees to be bound by its terms and conditions.
To this License Agreement the EuroSim Standard Terms & Conditions (issue August 2014) (hereinafter referred to as 'ESTC'), that are attached to this License Agreement, do apply. However, the conditions of this License Agreement do prevail.

Product Information

The License Agreement concerns the following EuroSim Software:

Product name: EuroSim Mk6.0

Product summary:

The EuroSim Software allows the user, by means of an extensive set of Graphical User Interfaces and Application Programmer Interfaces to create, import and integrate models into an executable simulator. The generated simulator can then be used interactively or in batch mode to perform real simulations according to various prepared missions. EuroSim furthermore supports the recording and analysis of simulation data. The product consists of a number of executable binary files and binary object libraries, and is delivered as installable package according to the delivery method prescribed by the chosen operating system distribution.

Product environment:
The environment that is required to run EuroSim is outlined in the Owners Manual, for each platform.

Product documentation:

- EuroSim User Manual
- EuroSim Owner's Manual
- EuroSim Software Release Note
- EuroSim FAQ

Licensed CPU: (to be completed by Licensee)

Host name: .....……

Operating system/version: ……

CPU type/frequency: ……..

Total cores:……

RAM Memory: ……...

Sys info (to be completed by EuroSim Consortium):

.....

License type: (Licensee to select the desired License Type)

Desktop | Workstation | Server | Runtime

License period: (Licensee to select the license period)

Period: Perpetual | End date:……..

Project: (Only applicable in case of license with end date)

Project name:……

List Price: (to be completed by EuroSim Consortium)

.....……

Maintenance Fee and Maintenance Period:

.....……

License Type and Period

The *EuroSim Software Desktop license* is node locked, single user and *soft* real-time.

The *EuroSim Software Workstation license* is node locked, single user and *hard* real-time.

The *EuroSim Software Server license* is node locked and multi user. *Hard* real-time execution is limited to a single user at any time.

The *EuroSim Software Runtime license* is node locked and single user. The Runtime license only allows for *hard* real-time execution of simulators that are built under a EuroSim Software Desktop, Workstation or Server license.

The EuroSim Software license with a defined end date provides the user the requested EuroSim Software license for a limited period as specified in this License Agreement. Such license is always limited to use within the specified project and includes maintenance.
